

## VACANCY ANNOUNCEMENT

FHI Clinical is a global clinical research organization (CRO) that provides comprehensive clinical trial services. FHI Clinical specializes in offering services to support the development of new medical treatments and technologies. This includes conducting clinical trials, managing regulatory processes, and providing scientific expertise across various therapeutic areas such as infectious diseases, vaccines, oncology, and more.

FHI Clinical works with pharmaceutical companies, biotechnology firms, and government agencies to advance medical research, improve patient outcomes, and support public health initiatives.

We seek a competitive and entrepreneurial candidate to join FHI Clinical Inc. <https://www.fhiclinical.com/>

No.	Job Title	Location & No. of Positions vacant	Job/Requisition ID	Deadline
1	Data Manager	Monrovia, Liberia (1)	1080	February 7, 2025

The Data Manager will manage clinical data related to clinical projects undertaken by FHI Clinical in accordance with the relevant trial protocol and other trial-related documentation, ICH GCP (and local adaptations thereof), local legal requirements, relevant FDA, EMA, and other international guidelines, as well as applicable procedural documents. The Data Manager will communicate with team members regarding data management related to trial data quality and timelines.
